

# PANDUAN INSTALLASI DRIVELOCK AGENT

PT. Kreasi Utama Mandiri | Manual

Untuk jaringan yang menggunakan ActiveDirectory, serta telah mengikuti **Panduan Installasi Avira Drivelock Management Console** dari awal hingga akhir. Maka semua proses installasi *Drivelock Agent* hingga *Antivirus Avira*, akan berjalan secara otomatis. Untuk memantau proses instalasinya dapat dilihat pada **Drivelock Control Center (DCC)**.

Sedangkan jika *ingin install agen manual* atau bagi *jaringan yang tidak menggunakan* ActiveDirectory maka ada 3 cara yang dapat dilakukan untuk menginstall **Drivelock Agent**.

**A. Push dari DCC :** installasi agent melalui **Drivelock Control Center** dimana PC Client dapat diadd ke DCC dengan beberapa cara seperti scan berdasarkan grup dan organization unit ActiveDirectory, IP Range, Name PC, ataupun berdasarkan Network Neighbourhood.

**B. Melalui Network :** installasi agent dengan menshare agent installer msi lewat jaringan.

**C. Manual :** installasi agent dengan mendatangi langsung PC Client.

Sebelum lanjut ke langkah-langkah installasi Drivelock Agent. Pertama-tama jalankan DCC

DriveLock Control Center secara manual

### A. Push dari DCC

Syarat :

- Windows Firewall harus nonaktif baik di PC yang terinstall DES maupun PC Client
- Network Discovery pada PC yang terinstall DES harus aktif
- Akun Administrator pada PC Client harus aktif serta memiliki password
- Jika ingin push install **by Name**, maka *PC yang terinstall DES* maupun *PC Client* harus bisa saling berkomunikasi menggunakan **Nama PC**.

### Langkah-langkahnya :
